The Berryhill Nursery Co.

Berryhill Landscape Service

HAVE you not admired a home that is surrounded by trees, shrubs, and flowering plants, and desired to have yours as attractive?

We will be pleased to send our landscape architect to your home for a consultation. He will discuss your planting problems with you. He will seek out the best views, as well as the undesirable ones, and will submit on paper carefully drawn planting plans, in which the desirable views are retained; the others will disappear with the growing of the trees and shrubs. This is a part of our service to home-owners.

Are you about to build? Have one of our landscape architects visit the proposed site. He will make suggestions for the location of the house, the walks, drives, out-buildings, and the plantings to furnish the setting for the house-to-be. This complete landscape service is free of charge, except on very large estates.

The Nursery

At our nursery you will find delightful dwarf evergreens for foundation plantings; varieties that will tie the house to the ground and give it a homey appearance. Taller growing evergreens, like the pines, spruces, and firs, give a picturesque skyline, and furnish backgrounds for all kinds of flowering shrubs, which we grow in great variety and quantity.

To give the garden its final trimmings, as lace sets off a garment, perennials should be used. All the best ones,

including the beautiful larkspurs and Canterbury bells, are ready for you. An abundance of perennials assures sufficient cut-flowers for the house and friends all summer.

Shade trees about the house or for street planting are really necessary for summer comfort. Well grown, straight specimens of all sizes can be furnished.
